## **INTRODUCTION**

This bulletin presents the results of official samples of commercial fertilizer taken during the period of July 1, 1999 through June 30, 2000 by the field inspection staff. The samples represented approximately 65,400 tons of fertilizer out of the approximately 950,000 tons sold during this period. The Laboratory made 3,086 nitrogen, 2,772 phosphorus, 2,858 potassium and 1,482 chloride, secondary and minor element and certain other analyses on these samples. The results of N, P<sub>2</sub>O<sub>5</sub>, K<sub>2</sub>O, and maximum chloride analyses of samples of mixed fertilizers and fertilizer materials and certain statistical analyses are in Table 1. Table 2 contains the results of secondary and minor element and certain other analyses and Table 3 is a listing of fertilizer registrants for Kentucky as of June 30, 2000.

## **EXPLANATION OF TABLES**

**Table 1.**

Sample Data—

Every official fertilizer sample taken during the year is listed in this table alphabetically by registrant and by "GRADE" within a registrant's listing.

**GRADE:** The registrant's whole number guarantee is expressed as the grade: N - P<sub>2</sub>O<sub>5</sub> - K<sub>2</sub>O. For custom mixes with fractional guarantees this represents the whole number part of the guarantee.

**NUM:** A Laboratory number (NUM) is assigned each sample and is the only code used by the laboratory to identify a sample.

**+** : A (+) beside a NUM indicates that the sample was analyzed for a secondary or minor element and the results are in Table 2

**N, P<sub>2</sub>O<sub>5</sub>, K<sub>2</sub>O:** These are the results of the chemical analyses of each sample for total Nitrogen(N), available phosphate (P<sub>2</sub>O<sub>5</sub>) and soluble potash (K<sub>2</sub>O).

**XS CL:** Each sample with a maximum chlorine guarantee was analyzed for chloride. If it exceeded the guarantee (XS CL), an asterisk (\*) appears in this column.

**RV:** The relative value (RV) of a NPK fertilizer is a comparison of its “found” value with its “guaranteed” value. An example calculation follows: A 6-24-24 fertilizer is guaranteed to contain 6% N, 24% P<sub>2</sub>O<sub>5</sub>, and 24% K<sub>2</sub>O. A “Guaranteed Value” and a “Found Value” are computed for the fertilizer by using the following example commercial values: N - \$4.00, P<sub>2</sub>O<sub>5</sub> - \$3.80, and K<sub>2</sub>O (Non-Tobacco) - \$1.60. The “Guaranteed Value” is calculated as follows:

<u>Element</u>	<u>Guaranteed ,%</u>	<u>Unit Value</u>	<u>Value</u>
N	6.0	X 4.00	= 24.00
P <sub>2</sub> O <sub>5</sub>	24.0	X 3.80	= 91.20
K <sub>2</sub> O	24.0	X 1.60	= 38.40
Total “Guaranteed Value”			153.60

The same procedure is followed for the “Found Value,” thus

<u>Element</u>	<u>Found, %</u>	<u>Unit Value</u>	<u>Value</u>
N	5.9	X 4.00	= 23.60
P <sub>2</sub> O <sub>5</sub>	24.1	X 3.80	= 91.58
K <sub>2</sub> O	23.9	X 1.60	= 38.24
Total “Found Value”			153.42

The relative value (RV) is then computed by dividing the “Found Value” by the “Guaranteed Value” and multiplying by 100.

$$RV = 153.42/153.6 \times 100 = 99.9\%$$

The RV is rounded to the nearest whole percent before being printed in the bulletin.

\* : Those results marked with an asterisk (\*) are deficient under the criteria stated in the investigational allowances section of this bulletin. Occasionally an analysis may be found that appears to be inconsistent in its marking. For example, two samples that are guaranteed 10% P<sub>2</sub>O<sub>5</sub> may both be shown as containing 9.1%. One of these may have an asterisk (\*) and the other may not. There are two situations which may cause this apparent discrepancy:

- (1) The investigational allowances are applied by computer to the laboratory analyses before the found analyses are rounded to the nearest tenth of a percent and printed. In the above example, if the laboratory found 9.09% for one sample and 9.13% for the other, only the first one would be marked (\*) as deficient.
- (2) The grade as printed is the largest whole number in the guarantee of each ingredient, that is, any decimal is dropped before the table is printed. For example, a custom-mixed lot of fertilizer may be guaranteed 11.9% P<sub>2</sub>O<sub>5</sub> and 11.2% K<sub>2</sub>O. The grade would be printed 0-11-11. However, the investigational allowances are applied on the basis of the 11.9% and 11.2% guarantees. If this custom mixed fertilizer analyzed 10.9% P<sub>2</sub>O<sub>5</sub> and 10.9% K<sub>2</sub>O, only the 10.9% P<sub>2</sub>O<sub>5</sub> would be marked (\*) because it is below the 11.9% guarantee by more than the investigational allowance.

**TYPE:** The codes for type are:

**BLEND** - A fertilizer made by physically mixing two or more fertilizer materials or non-fertilizer ingredients. It does not include custom mixes.

**MNFR** - An ammoniated-granulated fertilizer made by chemically mixing and/or reacting fertilizer materials.

**MAT** - A fertilizer material such as muriate of potash.

**CM** - A custom-mixed blended fertilizer.

**FORM:** The column headed "FORM" indicates whether the fertilizer was in bags, bulk, or in Liquid form when sampled.

#### Statistical Analyses --

In the body of the table there is a brief statistical analysis: (1) When one grade of a company was sampled 5 or more times or (2) when 10 or more total samples were obtained from a company. The terms used are self explanatory; however, the following additional explanation is considered helpful. CV is the coefficient of variation found by dividing the standard deviation by the average analysis and multiplying by 100. The deficiency rate is calculated by dividing the number of samples with one or more deficiencies in N, P<sub>2</sub>O<sub>5</sub>, K<sub>2</sub>O or RV by the total number of samples and multiplying by 100.

**Tables 2 and 3** - Self Explanatory

## INVESTIGATIONAL ALLOWANCES

A fertilizer shall be deemed deficient if the analysis of an official sample for any primary nutrient is below the guarantee by an amount exceeding the values in the following schedule.

### Primary Nutrients

Guaranteed %	Total Nitrogen (N) %	Available Phosphate ( $P_2O_5$ ) %	Soluble Potash ( $K_2O$ ) %
05 or less	0.37	0.65	0.39
06	0.47	0.71	0.47
07	0.59	0.77	0.56
08	0.72	0.82	0.63
09	0.81	0.86	0.70
10	0.89	0.89	0.76
12	1.03	0.95	0.87
14	1.18	1.02	0.96
16	1.29	1.12	1.05
18	1.43	1.19	1.12
20	1.57	1.32	1.18
22	1.62	1.39	1.22
24	1.65	1.46	1.26
26	1.66	1.53	1.29
28	1.58	1.59	1.33
30	1.28	1.67	1.36
32 or more	1.28	1.67	1.36

For guarantees not listed, calculate the appropriate value by interpolation.

For these investigational allowances to be applicable, the recommended AOAC International procedures for obtaining, preparing, and analyzing samples must be used. These are described in the current edition of "Methods of Analysis" published by the, AOAC International. 481 North Frederick Avenue, Suite 500, Gaithersburg, MD 28077. In evaluating replicate data, Table 19, page 935, Journal of the Association of Official Analytical Chemists, Volume 49, No. 5, October, 1966, should be followed.

Secondary and micro nutrients shall be deemed deficient if the analysis of an official sample for any of these elements is below the guarantee by an amount exceeding the values in the following schedule.

### **Secondary and Micro Nutrients**

<b><u>Element</u></b>	<b><u>Investigation Allowances</u></b>
Calcium	0.2 unit + 5% of guarantee
Magnesium	0.2 unit + 5% of guarantee
Sulfur	0.2 unit + 5% of guarantee
Boron	0.003 unit + 15% of guarantee
Molybdenum	0.001 unit + 30% of guarantee
Chlorine	0.005 unit + 10% of guarantee
Copper	0.005 unit + 10% of guarantee
Iron	0.005 unit + 10% of guarantee
Manganese	0.005 unit + 10% of guarantee
Sodium	0.005 unit + 10% of guarantee
Zinc	0.005 unit + 10% of guarantee

**The maximum allowance when calculated in accordance to the above shall be one (1) percentage point.**

The investigational allowance for relative value (RV) is three (3) percentage points. The investigational allowance for maximum chlorine is 0.5 percentage point.

## MONETARY PENALTIES

Penalties for deficiencies in Total Nitrogen (N), Available Phosphate ( $P_2O_5$ ), soluble potash ( $K_2O$ ), and index value shall be calculated from the following schedule.

<b>Number of Investigational Allowance Below Guarantee</b>	<b>Penalty Schedule</b>
$\leq 2$	Equal to the Monetary Value of the Deficiency
$> 2 \leq 3$	Two (2) Times the Monetary Value of the Deficiency
$> 3$	Three (3) Times the Monetary Value of the Deficiency

If the index value is greater than or equal to 97%, then the penalties calculated from the above schedule may be reduced according to the following schedule:

<b>Number of Investigational Allowances Below Guarantee</b>	<b>Penalty Adjustment</b>
No more than one (1) deficiency that is less than or equal to two (2) investigational allowances	Penalty adjusted to zero
No more than one (1) deficiency that is greater than two (2) but less than three (3) investigational allowances	Value of Overages may adjust up to 100% of the Value of the Deficiencies
Two (2) deficiencies that are less than three (3) investigational allowances; or, no more than one (1) deficiency that is equal to or greater than three (3) but less than four (4) investigational allowances	Value of Overages may adjust up to 75% of the Value of the Deficiencies

When a fertilizer is subject to a penalty from both a primary nutrient deficiency and an index value deficiency, only the larger penalty shall apply; however, in no case shall the penalty exceed the total value of the fertilizer

Penalties for deficiencies in secondary and minor elements and for excess chlorine in tobacco fertilizer shall be calculated from the following schedules.

#### **DEFICIENCIES IN SECONDARY AND MINOR ELEMENTS**

Number of Investigational Allowances Below Guarantee	Penalty Schedule
$\leq 2$	Equal to the Monetary Value of the Deficiency
$> 2$	Two (2) Times the Monetary Value of the Deficiency

#### **EXCESS CHLORINE IN TOBACCO FERTILIZERS**

Number of Investigational Allowances Above Maximum Chlorine Guarantee	Penalty Schedule
$< 2$	Equal to the difference in the Soluble Potash for Tobacco Unit Value and the Non-Tobacco Soluble Potash Unit Value.
$> 2$	Two Times the Difference in the Soluble Potash for Tobacco Unit Value and the non-Tobacco Soluble Potash Unit Value.

Any penalty assessed for a deficiency in N, P<sub>2</sub>O<sub>5</sub>, K<sub>2</sub>O, or RV shall be added to any penalty assessed for a deficiency in the secondary and minor elements or excess in chlorine and the total shall be paid by the registrant to the consumer of the lot of fertilizer represented by the sample within three months after the date of notice from the Director, receipts taken therefore and promptly forwarded to the Director. If said consumer cannot be found, the amount of the penalty payments shall be paid to the Kentucky Agricultural Experiment Station within three months after the date of the notice from the Director to the registrant and set aside (1) for purchase of equipment for the sampling, handling, analyzing and reporting of results of analyses of official samples and (2) for the education of the Kentucky fertilizer industry on the newest methods in manufacturing blended fertilizers. If the lot of fertilizer is on hand at a retail location the penalty payments assessed under this section shall be used to reduce the retail price of the fertilizer if it is to be relabeled and sold.

In no case shall the total penalties assessed exceed the retail value of the fertilizer

**MAXIMUM CHLORINE GUARANTEE FOR TOBACCO FERTILIZERS**

All fertilizer (bag, bulk, liquid, custom mixes, etc.) sold for or represented for use on field crop tobacco, not plant beds, must, in addition to the other guarantees specified by regulation, state a maximum chlorine guarantee not to exceed 2.5% in the following format:

**Chlorine (CL), Maximum .....2.5%**

The maximum chlorine guarantee shall be placed below the Guaranteed analysis required by regulation and shall be prominently and conspicuously displayed on the invoice or shipping ticket that accompanies bulk sales.

**NOTE:** The sections on Investigational Allowances, Penalties, and Maximum Chlorine were taken from the Regulations under the Kentucky Fertilizer Law.

**Note: An emergency maximum chlorine regulation was in effect in Spring 2000. It is shown below.**

All fertilizers, except bagged, sold for or represented for use on field crop tobacco shall, in addition to the other guarantees specified by 12 KAR Chapter 4, state a maximum chlorine guarantee not to exceed 50 lb. per acre chlorine (equivalent to 100 lb. of muriate of potash per acre) in the following format:

**Chlorine (Cl) Maximum                           50 lb./acre**

The maximum chlorine guarantee shall be:

Placed below the Guaranteed Analysis as required by 12 KAR 4:090 and prominently and conspicuously displayed on the invoice or shipping ticket that accompanies bulk sales.

The invoice or shipping ticket shall state the rate of application expressed in lb./acre of the blended fertilizer.

Bagged tobacco fertilizers shall be exempted from the provisions of this administrative regulation and continue to be guaranteed not to exceed two and five-tenths (2.5) percent chlorine.

The provisions of this administrative regulation shall not apply to fertilizers for use on plant beds.

**This emergency regulation has been changed to an “ordinary” regulation and applied to all tobacco fertilizer including bag, bulk and liquid.**

**COMMERCIAL FERTILIZER VALUES FOR CALENDAR YEARS  
1999 AND 2000**

Under provision of Chapter 250.401 of the Kentucky Law of 1995 the following unit values were used in assessing penalties for deficient fertilizer.

<b>Nutrient</b>	<b>1999</b>	<b>2000</b>
	<b>Dollars/Unit (20 lbs.)</b>	
Total Nitrogen (N)	\$ 4.01	\$ 3.82
Avail. Phosphate (P <sub>2</sub> O <sub>5</sub> )	\$ 5.28	\$ 4.41
Soluble Potash (K <sub>2</sub> O)		
Tobacco (Low CL)	\$ 5.80	\$ 5.54
Non-Tobacco	\$ 2.73	\$ 2.63
Calcium (Ca)	\$ 6.76	\$ .47
Magnesium	\$15.66	\$12.77
Sulfur (S)	\$ 5.26	\$ 5.54
Boron (B)	\$69.01	\$69.11
Copper (Cu)	\$69.40	\$70.26
Iron (Fe)	\$23.31	\$ 7.30
Manganese (Mn)	\$17.16	\$16.07
Zinc (Zn)	\$23.17	\$22.84

These values are statewide averages taken from a survey conducted in December of the preceding year. No attempt was made to distinguish between bag, bulk or liquid; or, blends and manufactured products.

TABLE 1. RESULTS OF TOTAL NITROGEN (N), AVAILABLE PHOSPHORIC ACID (P2O5), SOLUBLE POTASH (K2O), AND EXCESS CHLORIDE (XS CL) ANALYSES OF OFFICIAL FERTILIZER SAMPLES. Deficiencies in N, P2O5, K2O, and RV and excessive chloride are noted with an asterisk (\*). A (+) by the sample number indicates that there is an entry for this sample in Table 2.
